CREATE A PERSONALISED CATALOGUE

Create your own catalogue using your own product selection.

You can personalise it by giving it a project name and description, by choosing the order for the products to appear and by adding lifestyle images.

This catalogue will then be available in **Word, PDF and Excel** formats.

DATASHARE: ALL THE DOCUMENTS ARE FREELY AVAILABLE

Datashare is DELABIE's platform to download files.

There is no need to sign-in.

Product files, technical descriptions, photos, line drawings, BIM and AutoCAD files, installation guides and certificates are all available online.

BIM: DELABIE'S CORE PRODUCTS ARE NOW AVAILABLE

To meet the requirements of BIM technology, DELABIE has modelled its core products.

Available in 2 formats - **REVIT** and **IFC**, the files can be downloaded via the relevant product data sheet or via datashare.

The list of references available in BIM format is available in **Our Services - BIM Files**.

Certification
ISO 9001: 2015
quality management
system

ACS

Certificate of Sanitary Conformity.

All DELABIE products conform to the CPDW* directive modified 29/05/1997, and the French Ministry of Health circular DGS/SD7A2002 no. 571 dated 25/11/2002.

* Construction Products in Contact with Drinking Water (European Commission).

THE DAYS OF SMELLY LATRINES AND REPULSIVE SANITARY FACILITIES ARE GONE!

User's needs have changed. Even if cleanliness is fundamental, comfort and aesthetics also play an important role in upholding the facility manager's or owner's image.

Stainless steel is a prestigious, high quality material, shown at its best in the design of DELABIE's sanitary ware. A toilet, hand washbasin or urinal made from DELABIE's stainless steel have become key architectural elements for sanitary facilities.

THE FIGHT AGAINST VOLUNTARY OR INVOLUNTARY VANDALISM

Stainless steel is a highly resistant and durable material.

DELABIE's stainless steel sanitary ware will withstand heavy loads, abrasions, scratches and chemical products.

In areas requiring secure installations (e.g. prisons), cross wall options are ideal since the components and fixing elements cannot be accessed by the user.

ENVIRONMENTALLY FRIENDLY

Stainless steel is 100 % recyclable, contributing to sustainable development and protecting the environment. DELABIE's stainless steel sanitary ware contains 60% recycled stainless steel.

DELABIE's stainless steel sanitary ware requires less energy to manufacture due to the use of advanced technologies (cold pressing, TIG and laser welding).

Lighter than ceramic, their transportation consumes fewer resources.

STAINLESS STEEL, ESSENTIAL FOR HYGIENE

The aseptic qualities of stainless steel have been regularly proven. Stainless steel is bacteriostatic: bacterial retention after cleaning is extremely low, up to 20 times less than for other materials such as glass or plastic.

A thin, invisible protective layer forms continuously when in contact with air or water. If the surface is damaged mechanically, the stainless steel is protected against corrosion.

Particular attention has been paid to designing sanitary ware with limited assembly and reduced numbers of seams to avoid dirt deposits and bacterial niches, and therefore to facilitate cleaning.

S21 S standard WC pan and 700 S WC pan for people with reduced mobility

Wall-hung

- Wall-hung WC pan.
- Available with 700mm elongated pan for improved comfort for people with reduced mobility (700 S).
- Compatible with all standard frame systems available on the market.
- Elegant and simple design.
- Bacteriostatic 304 stainless steel.
- Stainless steel thickness: 1.5mm.
- One-piece pressed WC bowl, seam-free for easy maintenance and better hygiene.
- WC bowl surface is polished with rounded edges for easy cleaning.
- Concealed perimetral flushing rim.
- Horizontal water inlet: Ø 55mm.
- Horizontal waste outlet: Ø 100mm.
- Water saving: works with 4L or more of water.
- Shrouded WC pan.
- Pre-drilled holes for fixing the toilet seat. Supplied with stainless steel blanking caps when installed without toilet seat.
- Quick and easy to install from the front thanks to a stainless steel mounting frame.
- Supplied with fixing plate and 6 theft prevention TORX security screws.
- CE marked. Complies with European standard EN 997 for 4L flush.
- Optional toilet seat with or without lid (see page 41).
- Black protective pads can be ordered for the S21 S WC pan (see page 41) or the S21 S WC pan can be ordered with the black protective pads already fixed to the WC pan.
- Available for cross wall installation in service ducts (see page 70).
- Weight: 11kg for the S21 S model; 14.5kg for the 700 S model.

For flush valves see the DELABIE catalogue "Water Controls for Public and Commercial Places" (DOC 609INT).

HYBRIMATIC FINO urinal

With hybrid rinsing system

**• HYBRIMATIC system:**

- Battery-operated with 123 6V Lithium batteries.
- Concealed fluid detector.
- Waste with membrane and no water level.
- Electronics integrated into the urinal.
- Micro-rinse for one second after each user in eco programme (or after 3 seconds in comfort programme).
- High-frequency mode: the rinse takes place after the busy period.
- Hygienic duty flush for 7 seconds every 24 hours in eco mode (or for 14 seconds every 12 hours in comfort mode): prevents bad smells and blockages in the pipework.
- Flow rate pre-set at 0.07 L/sec. at 3 bar, can be adjusted.
- Stopcock.

• Wall-hung FINO rimless urinal:

- Compatible with all standard frame systems on the market.
- Bacteriostatic 304 stainless steel.
- Stainless steel thickness: 1.2mm.
- Polished satin stainless steel finish.
- Rear water inlet.
- Recessed horizontal waste outlet.

HYBRIMATIC: A SERIOUS ECOLOGICAL ALTERNATIVE TO WATER-FREE URINALS

Water savings

Traditionally, the urinal flush fulfils three roles: rinse the sides of the bowl, replace the water in the trap and prevent urine crystallisation in the pipework.

Thanks to the waste with a membrane, and the absence of a water level, HYBRIMATIC saves the water for replenishing the trap. Using only 7cl (1 second's worth of water flow), the whole of the bowl and the membrane is cleaned.

During busy periods, the high-frequency mode is active. The rinse only takes place once it detects the departure of the last user, reducing water consumption.

Ecological

Unlike "water-free" urinals, the HYBRIMATIC does not require the use of chemicals or costly products (liquids and cleaning products). Stainless steel is 100% recyclable, contributing to sustainable development and protecting the environment.

Unique detection system

The hybrid detection system is integrated into the urinal and is not visible from the exterior.

The rinse takes place automatically when fluid is detected in the urinal.

Easy to install and simple to maintain

The wall-hung urinal is compatible with all standard frame systems available on the market. It is supplied with all necessary fixings. Access to the internal components is simple and secure, from underneath the urinal.

Total hygiene

No manual contact prevents the spread of germs by hand. HYBRIMATIC's flush activates automatically when the user leaves. A hygienic duty flush takes place every 24 hours (can be adjusted to 12 hours). It prevents bacterial proliferation and the problem of blockages in the pipework.

HYBRIMATIC is supplied with a reduced-stagnation solenoid valve.

Minimal servicing

Regular rinsing reduces the frequency of urinal maintenance and membrane replacement.

Ideal for intensive use

DELABIE's sanitary ware is subjected to performance tests to ensure that it will withstand the demands of exposed environments. It is specifically designed for use in all types of public and commercial places.

Vandal-resistant

DELABIE has developed an automatic flush technology which is based on the detection of flowing urine. As a result, there are no cells visible or within the reach of the user. The internal components and fixing elements are concealed.

The HYBRIMATIC system is also available with the DELTACÉRAM ceramic urinal (see page 53).

DELTA urinal
Rimless

- Wall-hung individual rimless urinal.
- Compatible with all standard frame systems on the market.
- Bacteriostatic 304 stainless steel. Stainless steel thickness: 1.2mm.

EASY-D ceramic urinal pack

The "ready-to-install" solution

4 reasons to choose the DELABIE EASY-D urinal packs:**Packs specifically designed for public and commercial places:**

DELABIE's packs include robust products that will withstand intensive use and which are suitable for any user.

**"All-in-one" complete packs:**

DELABIE's packs include all the necessary items for complete installation - urinal, urinal valve, accessories and fixing elements – supplied in a single package for easy transportation and storage.

**100% DELABIE's own urinal valves:**

The packs benefit from all the advantages of our urinal valves such as: more than 60% water savings, easy to maintain, quick to install and simple adjustment.

**Hygienic packs:**

The products offered in DELABIE's packs are designed to reduce niches where bacteria can develop and facilitate cleaning.

**EASY-D ceramic urinal packs contain:**

- A ceramic rimless urinal which complies with European standard EN 13407 (CE marked): recessed or exposed waste outlet, with concealed trap; weight: 11.5kg;
- A TEMPOSOF 2 exposed time flow urinal valve: soft-touch operation, time flow ~3 seconds, flow rate pre-set at 0.15 L/sec. at 3 bar, can be adjusted, chrome-plated solid brass body;
- Chrome-plated neck tube with water nozzle;
- Waste and trap;
- Fixing elements kit;
- An installation guide.

Pack with TEMPOSOF 2 angled valve
Ref. 133888

Pack with TEMPOSOF 2 in-line valve
Ref. 133788

It is possible to buy a DELTACÉRAM ceramic urinal (with water nozzle, waste and trap) and add the desired DELABIE urinal valve: recessed or exposed electronic urinal valve, recessed or exposed time flow urinal valve. For urinal valves see the DELABIE catalogue "Water Controls for Public and Commercial Places" (DOC 609INT).

It is possible to buy a DELTACÉRAM urinal fitted with the HYBRIMATIC hybrid rinsing system. For more information about the HYBRIMATIC rinsing system, see page 49.

* Provisional availability: 2nd half of 2020.

Trough urinal

Wall-hung - 2 - 4 services

- Wall-hung trough urinal.
- Bacteriostatic 304 stainless steel. Stainless steel thickness: 1.2mm.
- Top water inlet F½. Drainage on the right.
- Supplied with 1 stainless steel sparge pipe (perforated horizontal pipe) for optimum rinsing of urinal surface.
- Water saving: optimal rinsing with 0.1 L/sec. per service i.e. 0.3L per use.
- Waste outlet 1½". Supplied with waste and integrated trap (ref. 785000).
- Weight: 17.5kg for the 1,200mm model; 24.8kg for the 1,800mm model; 32.1kg for the 2,400mm model.
- Possible to add one or more bacteriostatic 304 stainless steel dividers. Fix directly onto the urinal in the desired location.
- Installation advice: If you wish to install 2 urinals side-by-side, we recommend ordering one urinal with drainage on the left and one urinal with drainage on the right.

For urinal valves see the DELABIE catalogue "Water Controls for Public and Commercial Places" (DOC 609INT).

SANITARY APPLIANCES CERTIFICATION

What is the CE mark?

The CE mark is a mandatory European marking for all products subject to one or more European Directives. It indicates that the products comply with the essential requirements regarding safety, public health and consumer protection. It gives the products concerned the right of free movement throughout the European Union.

In order to mark its products with the CE mark, a manufacturer must carry out, or have carried out on its behalf, checks and tests which ensure that the product complies with the essential requirements set out in the relevant Directives.

How do you recognise a CE marked product?

The CE mark is normally displayed on the product or, if not, on the packaging or accompanying documents.

The manufacturer must draw up a CE declaration of conformity (declaration of performance). In the document the manufacturer states that the product complies with the "essential health and safety requirements" that apply to the product and for which the manufacturer assumes responsibility.

All the CE declarations of conformity (declarations of performance) are available online at www.delabie.com.

Which sanitary appliances carry the CE mark?

European Standard	Product family
EN 14688	Washbasins
EN 14296	Communal wash troughs
EN 997	WC pans and close coupled WCs with an integral trap
EN 13407	Wall-hung urinals
EN 14527	Shower trays

What does the CE mark provide for sanitary appliances?

The CE mark guarantees the performance and safety of sanitary appliances for normal use, in particular in terms of hygiene, efficiency and reliability.

The main elements tested, depending on the type of sanitary appliance, are:

- resistance to loads (150kg for washbasins, 400kg for WCs, 100kg for urinals);
- the evacuation of water with no stagnation (washbasins, shower trays);
- resistance to water temperature variations;
- resistance to chemical products and cleaning products (acetic acid, sodium hydroxide, ethanol, sodium hypochlorite, methylene blue, sodium chloride);
- resistance to scratching and abrasion;
- ease of cleaning;
- optimal pan rinsing (WCs and urinals);
- the effective evacuation of residues for WCs (tests with toilet paper and plastic balls);
- no splashing, or splashing outside the toilet bowl (WCs, urinals).

MAINTENANCE ADVICE

Stainless steel is easy to clean and is very durable over the long term.

When stainless steel comes into contact with certain chemical substances or with inappropriate cleaning agents, there is a possible risk of staining or discolouration.

In order to guarantee the stainless steel's properties against corrosion, it is essential to always keep the surface clean.

For everyday cleaning, we recommend following the instructions below:

- use mild soapy water;
- rinse thoroughly with clean water;
- dry with a soft and clean cloth.

Never use abrasive products, scouring powder, bleaching products such as bleach or any other chlorine, acid or alcohol-based products. If the product comes into contact with any of these, rinse thoroughly with clean water.

RECOMMENDED INSTALLATION HEIGHTS (mm)

	Height	Standard installation height	Installation height for PRM*	Installation height for children
Hand washbasins*		800	850	X
Washbasins		850 - 900	800 - 850	550 - 700
Wall-hung WC pans		400 - 430	450 - 500	350 - 390
Urinals		650 - 710	Install urinals at different heights	400 - 500

* **Hand washbasins:** washbasins less than 530mm in width, designed only for hand washing (source: European standard EN 14688).

* **PRM:** People with reduced mobility = People that experience trouble moving around, either temporarily or permanently.
For example: the sensory impaired and people suffering from a mental illness, people in wheelchairs, people missing limbs, people of short stature, the elderly, pregnant women, people carrying heavy luggage and people with children (including children in pushchairs).

For more information on the installation of sanitary areas for people with reduced mobility please consult the Space guide found in the DELABIE "Accessibility and Accessories" catalogue (DOC 950INT).

References prefixed by * are available while stocks last. References are listed in ascending alphanumeric order.

The general terms and conditions are valid for all customers.

ORDERS AND QUOTATIONS:

These will be processed in order of receipt.

We do not accept open orders or orders for call-off.

All orders sent imply acceptance of our general terms and conditions of sale and customers waive any claims that may arise from clauses in their own documentation which may differ.

The customer agrees to these terms from the moment that we receive their order, which cannot be cancelled. Orders are accepted without obligation to deliver the order in full in one delivery.

Our commercial representatives are not authorised to agree additional terms verbally, or to provide verbal guarantees beyond those provided in the written contract. In the event of default or delayed payment, the Company will be entitled to suspend deliveries or cancel existing orders without any claim for damages from the customer. In the event of a change in circumstances of the buyer, we reserve the right to cancel existing orders or to demand payment guarantees.

Our quotes do not amount to specifications; specifiers and professional installers are solely responsible for the choice of products according to their intended use, current regulations and recommended guidelines.

PRICE:

Deliveries are invoiced according to the conditions in place at the date of despatch. Prices are given without guarantee and they may be changed without notice subject to fluctuations in costs, VAT or other taxes, according to the prevailing economic conditions.

Price increases will be announced one month prior to their application, and they apply to quotes and orders in hand.

PAYMENTS:

Terms of payments are confirmed when an account is opened, and are dependent on the terms of our credit insurance, and according to each country. We do not give discount for early payment.

In accordance with Article L441-6 of the Commercial Code, any delay in payment will give rise to the following from the first day of delay, regardless of their status with the supplier:

- An interest rate for delayed payment will be applied, equal to the European Central Bank refinancing rate plus 10% (French Law of Modernization of the Economy - LME - No. 2008-776 of 4th August 2008);
- A one-off payment of 40 Euros will apply to cover expenses (European Directive 2011/7 of 16th February 2011, Law 2012-387 of 22nd March 2012, and Decree 2012-1115 of 2nd October, 2012);
- When the recovery costs exceed the amount of the one-off payment, additional compensation will apply where justified.

In the case of late payment, a one-off payment may be required, replacing existing conditions. We will not accept any set off, only our assets have a legal value.

DELIVERY TIMES:

Despatch dates are indicative only and we shall not be liable for any delay or failure in carrying out our obligations where the delay or failure to deliver is caused by risks of manufacturing or where the cause is beyond our control. Delivery delay will not give rise to compensation payment or goods rejection.

SHIPPING:

Orders are sent to our distributors. We do not deliver to site. The buyer assumes responsibility for carriage and packing costs unless otherwise stated in the Incoterms on the invoice accompanying the goods. The goods are always forwarded at the buyer's own risk, whatever the method of transport, even if the carriage is free and special conditions have been granted. The carrier is solely responsible for their delivery, and in the event of delay, missing items, damage or other dispute, the customer must indicate this via the delivery driver's paperwork (either electronically or in hard copy) AND follow up with written notification sent by recorded delivery within 24 hours. A copy of this letter must be addressed to us.

CLAIMS:

No claim will be allowed where the delay in reporting exceeds 8 days following receipt of the goods. The whole of the delivery cannot be rejected because of partial damages and shortages.

PROPERTY IN GOODS:

Notwithstanding any agreed terms of sale, the goods shall remain the property of the seller until payment is made in full. The failure to meet a payment deadline may result in the reclamation of these goods.

The buyer assumes the risks of loss or damage, regardless of the means of delivery, as described in 'DELIVERY TIMES' and 'SHIPPING' above, as well as liability for the damage they might cause.

WARRANTY AND RESPONSIBILITY:

Our products are warrantied against any manufacturing defect for a period of 10 years, including electronic controls, excluding other electrical accessories (e.g. hand dryers, etc.) which have a 3-year warranty from the invoice date. This does not apply to products with an expiry date. This warranty is limited to replacement or repair of defective components as determined by our workshops in France but excludes the costs of spoilage, handling and carriage or compensation whatever they are. We are not responsible for handling charges and the cost of returning products to our workshops.

Disasters or major water damage as a result of manufacturing defects are covered by our product and/or public liability insurance.

Our warranty and responsibility does not include the following:

- installation that does not comply with the technical specification or current recommended guidelines;
- worn parts;
- non-compliance with installation, user and maintenance guides;
- other factors independent of our products' quality, for example: detergents or abrasive cleaning products, the action of hard water, foreign bodies (e.g. gravel, sand, iron filings, scale, etc.), chemical and electrolytic phenomenon;
- lack of supervision, poor storage or poor maintenance;
- product modifications or actions by the customer, or a third party, without our authorisation using non-DELABIE components and/or consumable items.
- products past their expiry date.

The water-tightness of connections, joints and the product housing is the responsibility of the professional responsible for installation, and must be guaranteed by them. Warranty excludes joints, valves, washers and rubber seals. However they would be supplied if the warranty application requires them. Any finishes other than chrome or nickel are also excluded from the warranty. In the event that the product has been discontinued or manufacturing methods have changed and replacements are not available, similar alternative products will be offered. Replacement under warranty will not extend the duration of the original warranty.

Legal warranty of latent defects applies in any event.

SPARE PARTS:

Spare parts and mechanisms that are essential to ensure the correct operation of our products will be held in stock for the duration of the guarantee. They are listed at the back of our catalogues.

RETURNS:

Goods may not be returned to us for credit without our prior written approval obtained by the buyer from the Company and they are received in a good state (determined by our goods inwards department). All transportation costs for returned goods must be paid by the buyer. Goods must be returned to our factory* with good protective packaging. Deliveries less than a month old will be refunded at the invoiced price. For deliveries older than one month, a deduction will be made for checking, handling and administration costs. A repair and re-stocking fee will apply where appropriate.

Product returns are not permitted in the following circumstances: discontinued products, specially manufactured products, technical or aesthetic evolution of the product since the date of purchase, scratched or damaged products, products purchased more than one year previously, products with an expiry date. If sent to DELABIE, those products outside the scope of returns will be immediately destroyed/recycled, and will not be returned to the customer.

The schedule of standard deductions is as follows:

- return less than 1 month: refund at invoiced price
- return between 1 and 3 months: deduction of 15%
- return between 3 months and 1 year: deduction of 30%
- return after 1 year: no refund possible.
- return without prior agreement: additional deduction of 5% of the value of the goods with a minimum value of €50 excl. VAT.

* DELABIE S.C.S.

18, rue du Maréchal Foch
80130 Friville Escarbotin – FRANCE

CLEANING - MAINTENANCE:

Clean with slightly soapy water only, using a soft cloth or sponge, rinse and dry thoroughly. Do not use abrasive or chlorine-based products (with a hydrochloric acid base), or dyes.

PHOTOGRAPHS AND DRAWINGS:

All photos, drawings or illustrations are for illustrative purposes only, without contractual obligation, and may be subject to change without notice.

We reserve the right to modify designs and dimensions without notice and without recourse. This applies to all references, dimensions, information contained in various documents, catalogues, installation guides, price lists and websites, which can be modified or discontinued at any time without notice.

INTELLECTUAL PROPERTY AND USE OF CONTENT:

The content (including but not limited to the information, text, graphics, data, images, photos, visuals, videos and soundtrack, and the format of all these elements and our catalogues, websites, etc.) are protected under copyright and/or other intellectual property. The contents are the sole property of their respective editors. Any copying, reproduction, use, adaptation, alteration, modification, translation, dissemination, complete or partial, of content, whether they belong to DELABIE or a third party which has granted the rights to DELABIE, by any means whatsoever, is illegal except for the limiting rights that are granted below, and/or private copying for the exclusive use of the copier. The content presented in our communication and business tools may be subject to change without notice and are provided without warranty of any kind, express or implied, and cannot give rise to any right to compensation. Protected content may be specifically identified by the following copyright notices: © or "All rights reserved".

The names and logos appearing in our catalogues and websites are registered trademarks. These distinctive marks are the exclusive property of DELABIE or third parties who have granted the rights to DELABIE. Any use, complete or partial reproduction, or imitation of these marks is prohibited without prior express consent of DELABIE.

Alteration and modification of the contents or their use for any purpose other than that authorised, constitute an infringement of DELABIE's, or a third party's, property rights. With the following limitations, DELABIE grants you the right to download and distribute the content:

- where the download function exists
- for non-commercial purposes
- in good faith
- for maintaining the proprietary notices intact, and for the publication or posting of existing content online, if such information is stated. This right should in no way be interpreted as a trademark or copyright license for the aforementioned content.

PERSONAL DATA PROTECTION:

In line with the General Data Protection Regulation (GDPR), DELABIE is doing everything necessary to limit to a bare minimum the collection of personal data, and its conservation and ensure its protection.

DELABIE only uses this data for its own use for purposes of information and commercialisation of its products. It is not, under any circumstances, given to third parties.

The right of access, rectification, removal and opposition to the processing in addition to the limitation and transferability of your data is possible on request to our Data Protection Officer (DPO) at DELABIE via email (dpo@delabie.fr) or recorded delivery with a photocopy of a photo ID to the following address: DELABIE, 18 rue du Maréchal Foch, 80130 FRIVILLE, France.

EXCLUSIVE TERRITORIES:

In most countries throughout the world, our company has entered into exclusive agreements with organisations to import and distribute our products. Within this framework, our clients cannot sell our products outside their national borders without an express prior agreement on our part.

JURISDICTION:

Acceptance of an order delivered from France settles the contract under the French law. All disputes arising from the present contract will be settled definitively by the Court located in the area of our domicile, even in the event of multiple defendants, regardless of the delivery location or stipulated payment. All clauses to the contrary will be considered null by the mere fact of having dealt with our company.
